

## **City of Yuma Building Permit Fees – 2018 IBC and IRC**

**Building Permit Fees.** Building Permit fees for new construction are determined through the use of two tables, the Building Valuation Data (derived from ICC Building Safety Journal Construction Cost Data, updated annually) and Table 1-A, Fee Schedule (from Section 150-016 and 150-181 of the Yuma City Code).

For New Construction, the occupancy classification, square footage and the type of construction of the building are needed in order to determine the building permit and plan review fees using these tables.

For example a new 5,000 sq. ft. professional office building has a Type VB construction (combustible, non-fire resistive). From the Building Valuation Data table, a Group B Business Occupancy of Type VB construction has a valuation rate of \$100/sq ft. Accordingly, the new office building has a total valuation for the building permit fee of \$500,000. From Table 1-A, the building permit fee, for a total valuation range between \$100,001 to \$500,000, is \$1,180 for the first \$100,000 plus \$6.00 for each additional \$1,000 or fraction thereof, to and including \$500,000. The building permit fee for this office building is \$3,580 which would be due at time of permit issuance. The plan review fee is 65% of the building permit fee amount, or \$2,327, which would be due at time plans are submitted for review.

For Alterations and Remodeling work, the Total Cost of the Alterations is used in conjunction with Table 1-A to determine the building permit fee. The plan review fee is 65% of the building permit fee amount.

Additional permits and fees are required for the plumbing, mechanical, electrical, and fire sprinkler systems associated with the building construction, and are calculated separately based on the specific quantities and systems associated with the building. These additional permit fee amounts are calculated after plans are submitted and are due at time of permit issuance.
